

Pain Management

- 1) _____ Diagnostic and therapeutic peripheral nerve blocks
- 2) _____ Placement of subarachnoid or epidural indwelling catheters
- 3) _____ Implantable infusion pump systems
- 4) _____ Insertion of neurostimulator systems
- 5) _____ Central splanchnic / sympathetic blockade – (Celiac plexus; hypogastric plexus, etc.)
- 6) _____ Peripheral sympathetic block (stellate ganglion / paravertebral sympathetic block)
- 7) _____ Epidural injection – cervical, thoracic, lumbar, caudal with steroid and/or local anesthetic and/or alpha-2 agonists
- 8) _____ Subarachnoid injection – cervical, thoracic, lumbar, caudal with steroid local anesthetics, and/or alpha-2 agonists
- 9) _____ Intravenous regional block (Bier)
- 10) _____ Intravenous conscious sedation in conjunction with pain management procedures
- 11) _____ Neurodestructive procedures utilizing:
 - Neurolytic agents (phenol, EtOH)
 - Cryoneurolysis
 - Ultrasound
 - Thermocoagulation
- 12) _____ Zygoapophyseal / facet joint injections (cervical, thoracic, lumbar)
- 13) _____ Large joint injections (shoulder, hip, knee, etc.)
- 14) _____ Pain treatment procedures as identified:
